Re: Carrier Air Conditioning Superfund Site (Carrier)

Dear Mr. English:

Please find enclosed the Carrier Draft Remedial Design (RD) Work Plan. I would appreciate your review and comments by May 31, 1993. Carrier Corporation and EnSafe have requested a meeting before EPA provides formal comments. The meeting is tentatively scheduled for the week of May 24th in Memphis or Collierville, TN. I hope you or someone from your staff can attend.

As you are aware, EPA has retained Montana State University (MSU) to assist in developing the RD/RA Data Quality Objectives (DQOs). Due to lack of time, MSU was unable to provide the DQOs to EnSafe prior to the RD Work Plan development. The revised RD Work Plan will include the DQOs.

As a result of the RD scoping meeting that the Carrier Corporation, EnSafe, EPA, MSU, and the State of Tennessee attended, agreement was reached that additional Memphis Sands monitoring was required to confirm complete capture by the municipal wells. The number of wells and the depth of these wells was not agreed upon. Carrier believes one well will answer the question. EPA preferred two wells, but may agree to one depending upon the location.

Should you have any questions, please contact me at (404) 347-7791.

Sincerely,

Beth Brown  
Remedial Project Manager
